

Usage of and trust in various authentication means in Baltics and Finland

October, 2018

REPORT

Methodology

Research objective

To understand the usage experience of and trust in various authentication means in Baltics and Finland

Method

Online survey

Target group

Residents of Latvia, Lithuania, Estonia and Finland in the age 18-65 years

Sample

The sample represents the structure of residents by age, gender, settlement type and region (in Latvia and Estonia – also nationality).

Latvia N=1005

Lithuania N=1005

Estonia N=1005

Finland N=1004

Fieldwork period

October, 2018

Terms used

*Sample size $30 < n < 50$ is an insufficient number to make statistically significant conclusions

** Sample size of $n < 30$ is extremely small, data are only illustrative.

Survey conductor

This survey was ordered by SK ID Solutions and conducted by market research company RAIT Group.

Sample Structure (1)

	N=	Latvia 1005	Lithuania 1005	Estonia 1005	Finland 1004
GENDER					
Male		46	45	49	50
Female		54	55	51	50
AGE					
18-29		25	29	26	24

Summary

Key take-aways

Basically a 100% of the economically active target groups in Baltic and Finland (18-65 years) use at least one electronic authentication solution. Security is the main selection criterion, because usage of banking and financial services is the most frequent and most intended activity performed with electronic authentication solutions.

- **Facebook, Google and code cards – those are the most common authentication solutions used in all countries.** Estonian residents more use also ID cards and Finnish – some other tools offered by banks for electronic authentication purposes.
- **About a third part of Baltic and Finnish residents do not care, what is the identity of the provider of electronic authentication solutions.** Private sector providers are preferred by about a tenth part or less, while state as a provider is preferred by a third part in Latvia and about a half in the other countries.
- In Latvia and Lithuania electronic authentication solutions are more frequently used also for online shopping and communication with the state, in Estonia for signing documents and online shopping, while in Finland – for using healthcare services and online shopping.
- **Electronic signatures among the population are the most widespread in Estonia** – only 2% of the 18-65 target admits they don't give e-signatures at all. Mainly they use ID cards for this purpose.

In other countries the issue with e-signatures is a bit controversial – it seems that rather large part does not see a difference between e-signature and electronic authentication, since some part of them say they give electronic signatures with code cards or Smart-ID and there is only a small share that mentions either ID cards or available mobile signature solutions.

- **Rather many respondents in all countries say they have some restrictions to use electronic authentication solutions.** The primary concern is **either security or trust in the provider** as well as some implementation difficulties or belief that it can't be used everywhere.
- **The most trusted solutions overall – ID cards, mobile signatures, Smart-ID and code cards.**

Summary of the main results (1)

TOP 3 most used electronic authentication solutions

Base: All respondents

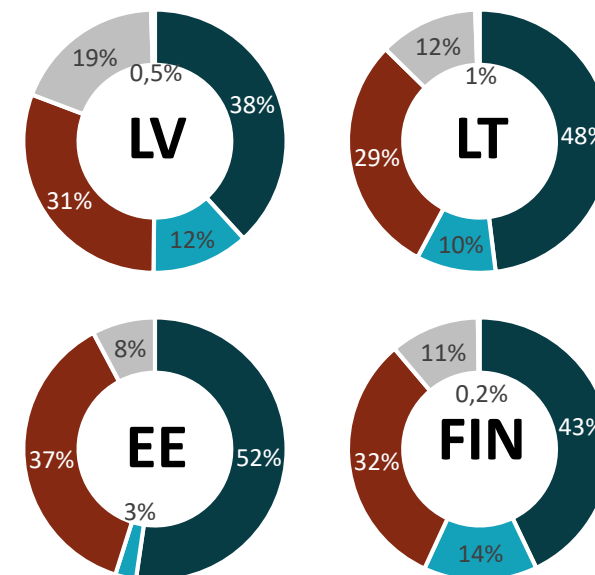

TOP 3 most important choice factors for electronic authentication solutions

(from 1 (the most important) to 6 (the least important))

Base: Users of at least one electronic authentication solution in the P6M

Importance of the provider identity

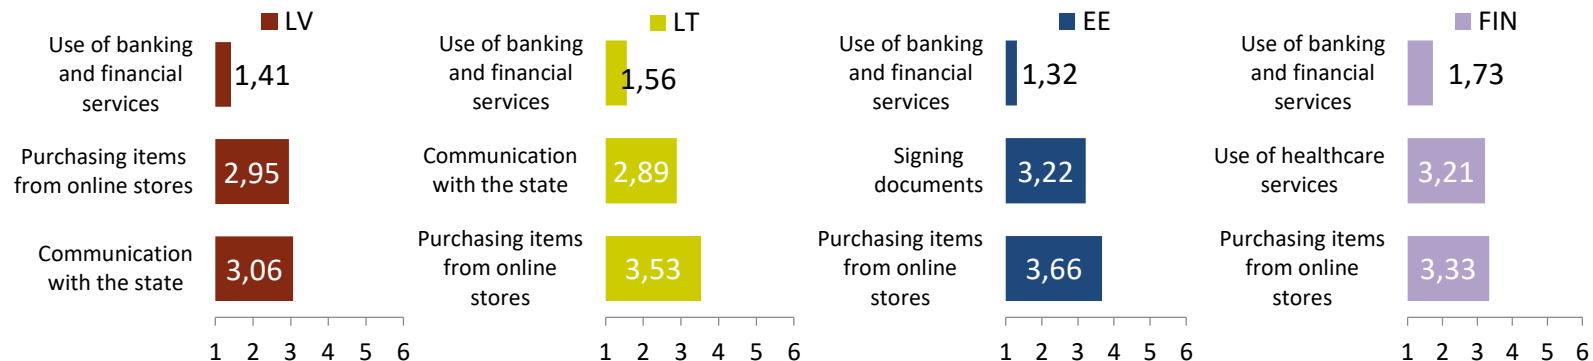

- Yes, I prefer a solution provided by the state
- Yes, I prefer a solution provided by the private sector
- No, it does not matter
- I do not know who provides the solution I use
- Other

Base: Users of at least one electronic authentication solution in the P6M

Summary of the main results (2)

TOP 3 most frequently performed actions with electronic authentication solutions

(from 1 (the most frequent) to 6 (the least frequent))

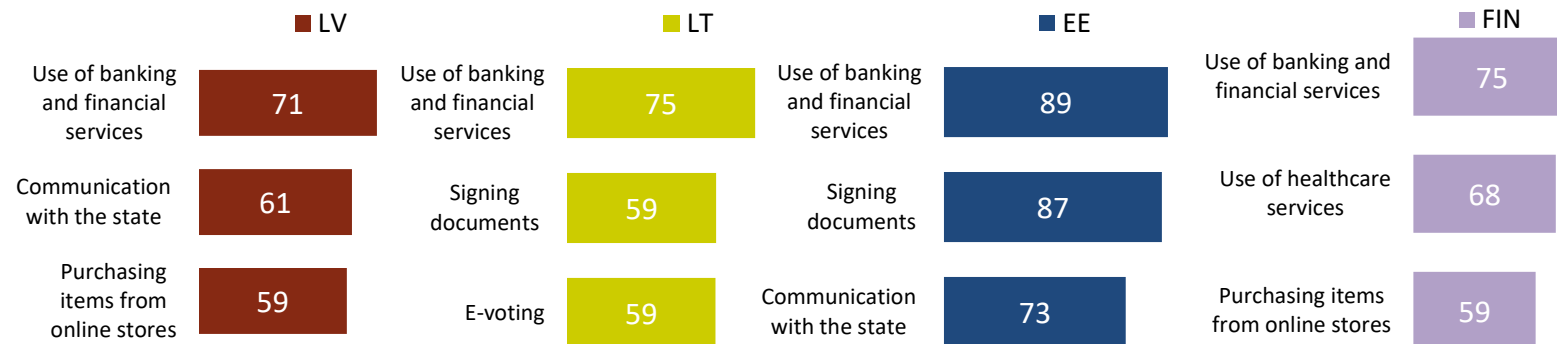

Base: Users of at least one electronic authentication solution in the P6M

TOP 3 most known and used solutions for electronic signature

Base: All respondents/ Users of at least one electronic authentication solution in the P6M

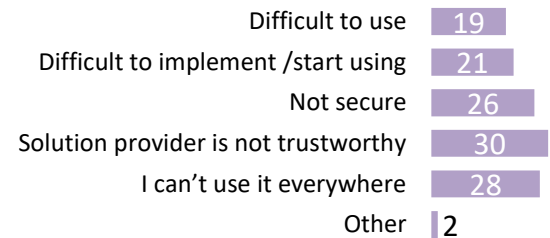

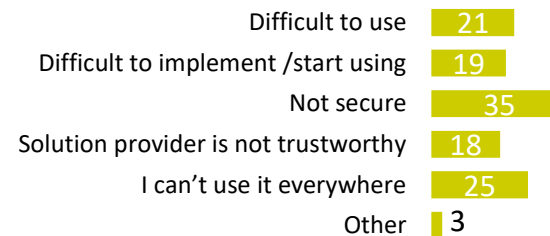

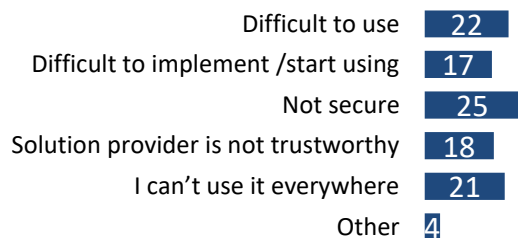

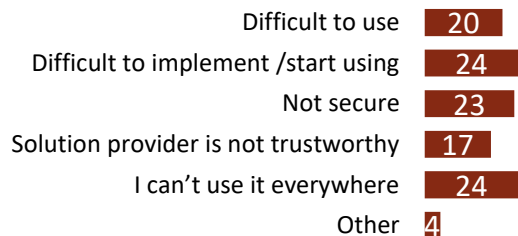

TOP 3 most intended actions with electronic authentication solutions

Base: All respondents

Summary of the main results (3)

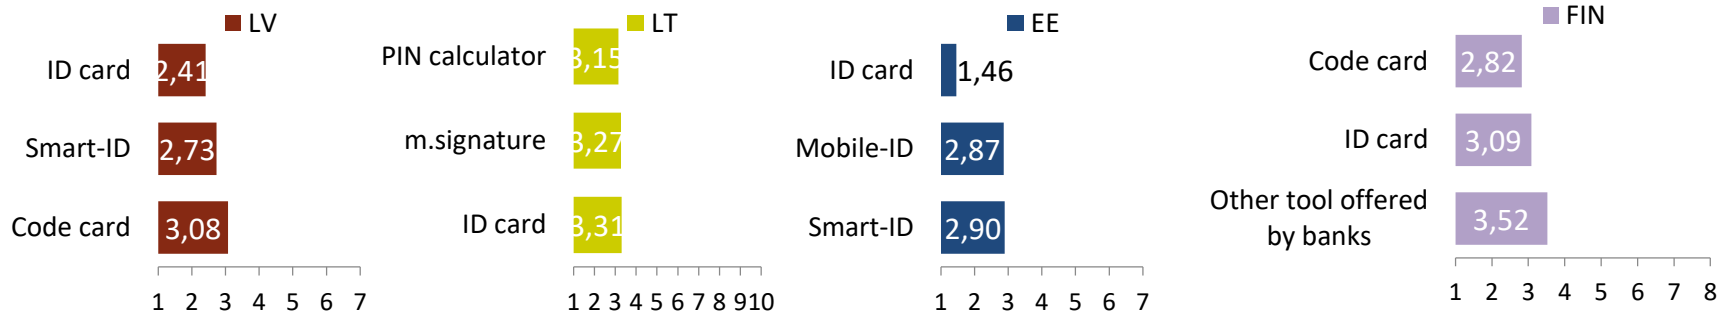

The main restrictions to use electronic authentication solutions

Base: All respondents

TOP 3 most trusted electronic authentication solutions

(from 1 (the most trusted) to 7/ 10/ 7/ 8 (the least trusted))

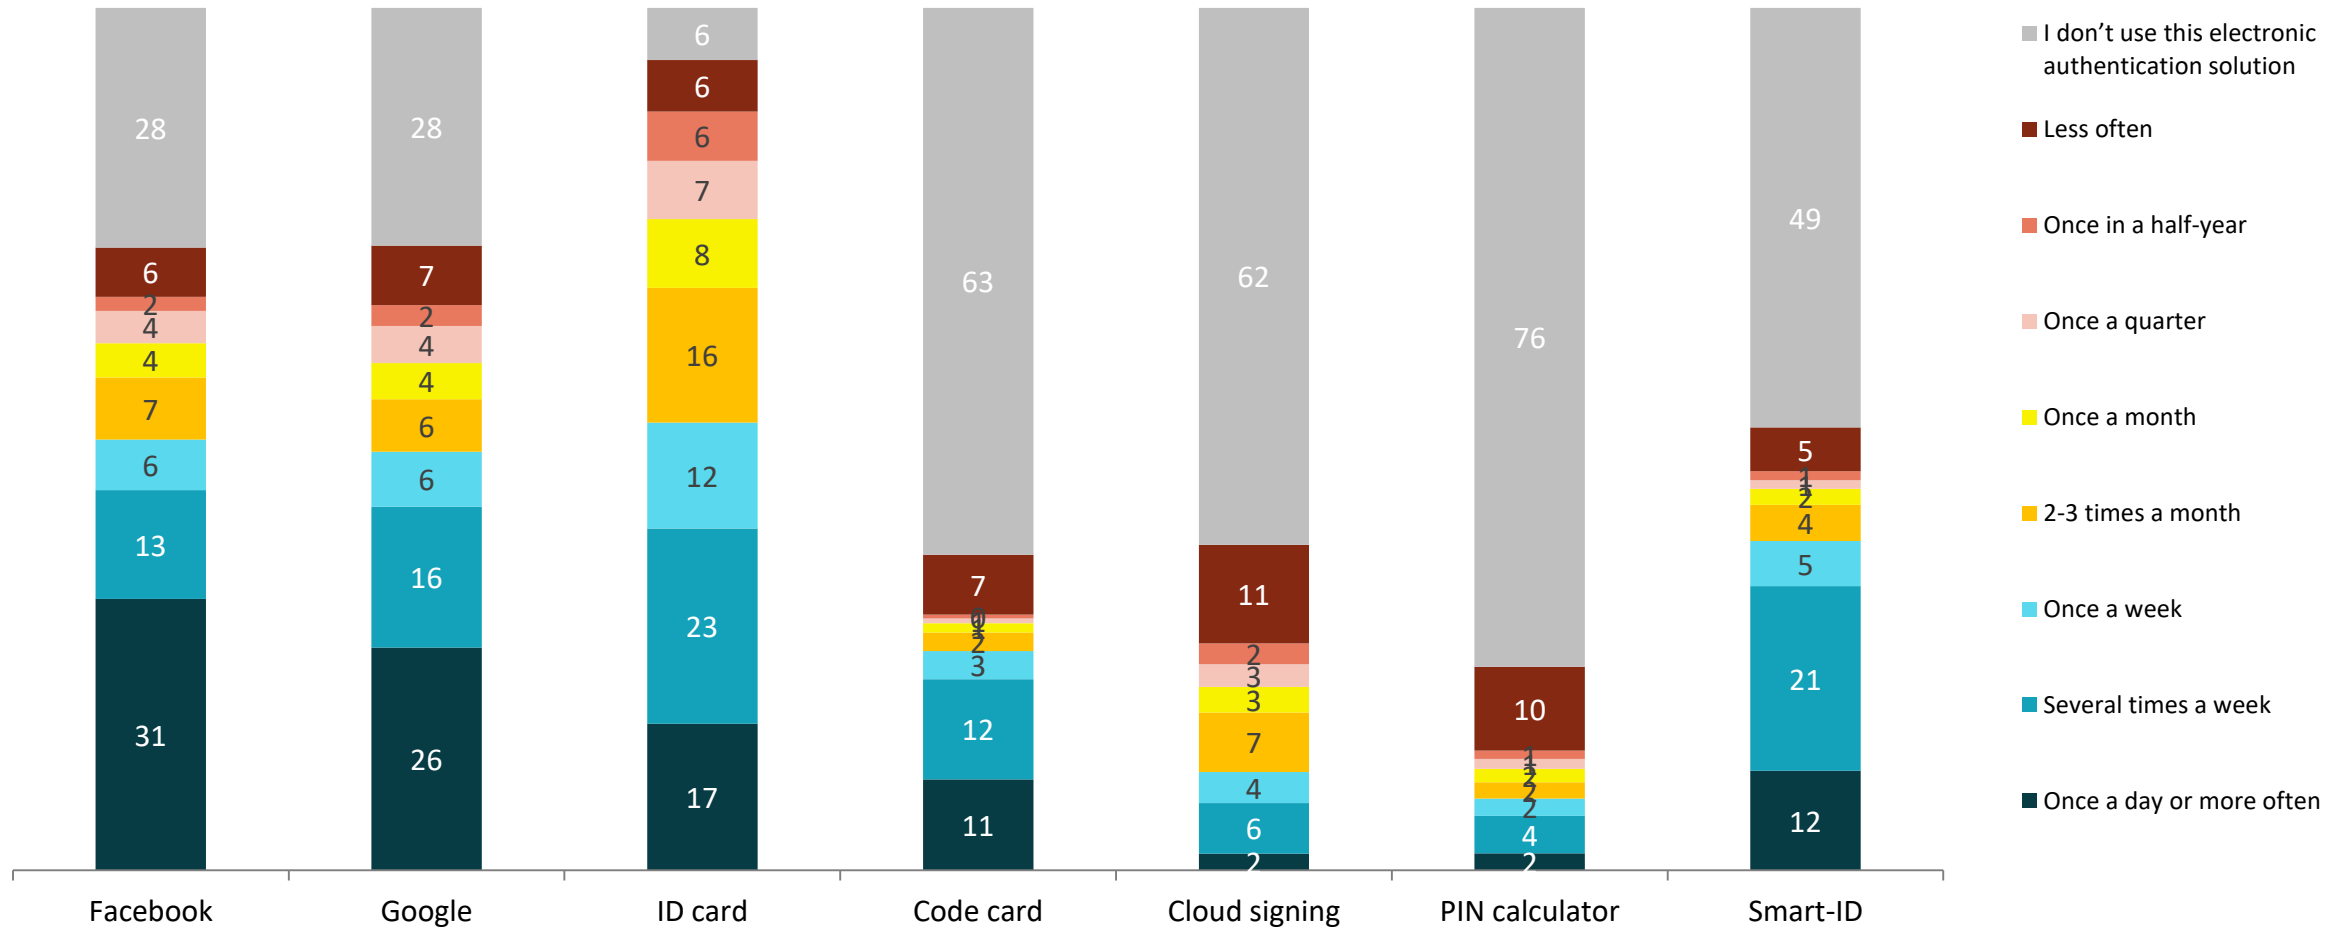

Base: Users of at least one electronic authentication solution in the P6M

Main results - ESTONIA

Usage frequency in the past 6 months (%)

ESTONIA

Q1. How often have you used these types of electronic authentication solutions in the past six months?

Base: All respondents, n=1005

Importance: choice of electronic authentication solution (mean)

ESTONIA

3% mention also other important factors, like:

Price/ free of charge, Fast, One solution for all/ many services etc.

Q2. What is the most important to you when choosing an electronic authentication solution? Please, rank these aspects in the order of importance – drag them to the right side starting with the first – most important.

Q2a. Is there something else that is/ would be important for you when choosing an authentication solution?

Base: Users of at least one electronic authentication solution in the P6M, n=1003

Preferred devices for electronic authentication solutions (%)

ESTONIA

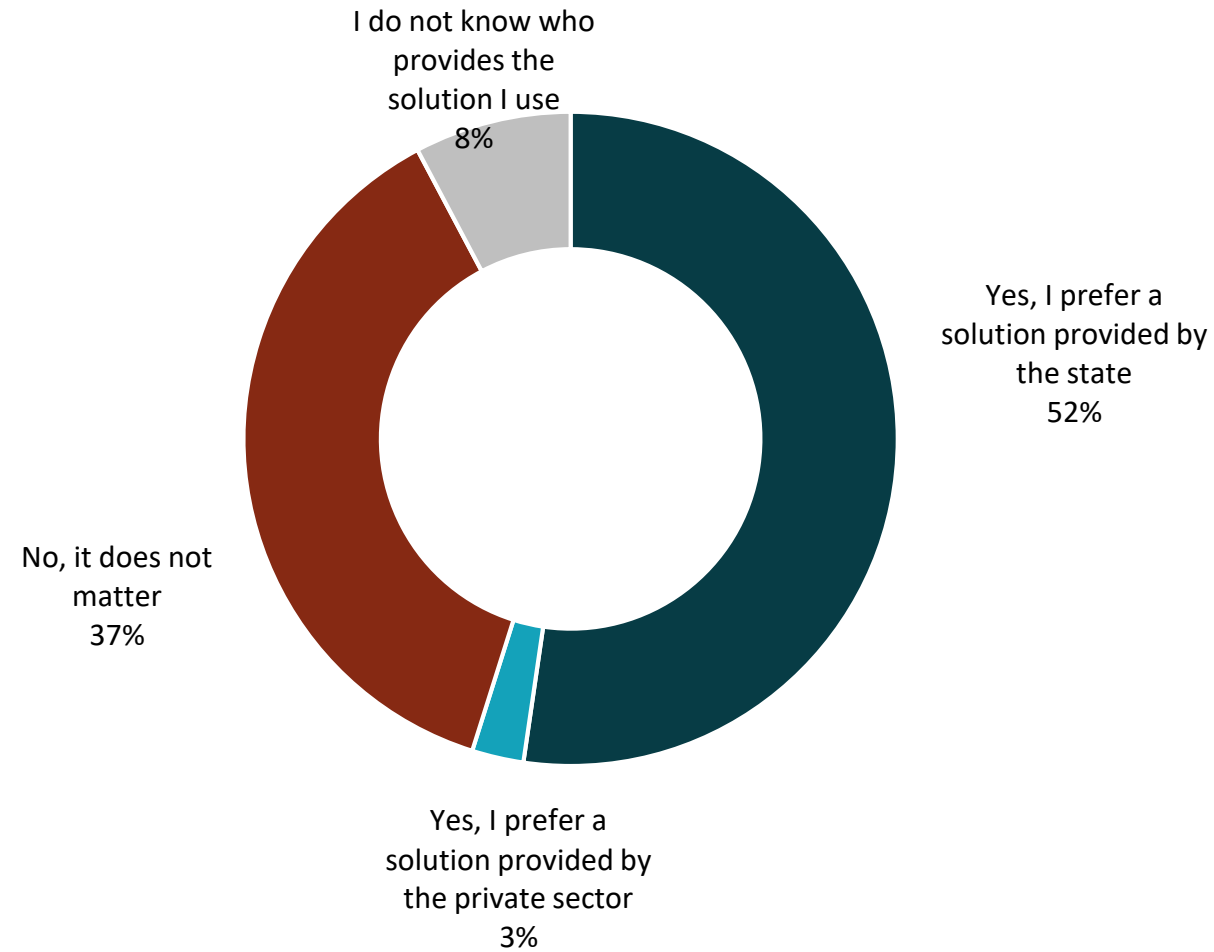

Q3. If you could choose, which devices would you prefer to use electronic authentication solutions on?

Multiple answers possible, $\Sigma > 100\%$

Base: Users of at least one electronic authentication solution in the P6M, n=1003

Importance of the provider identity (%)

ESTONIA

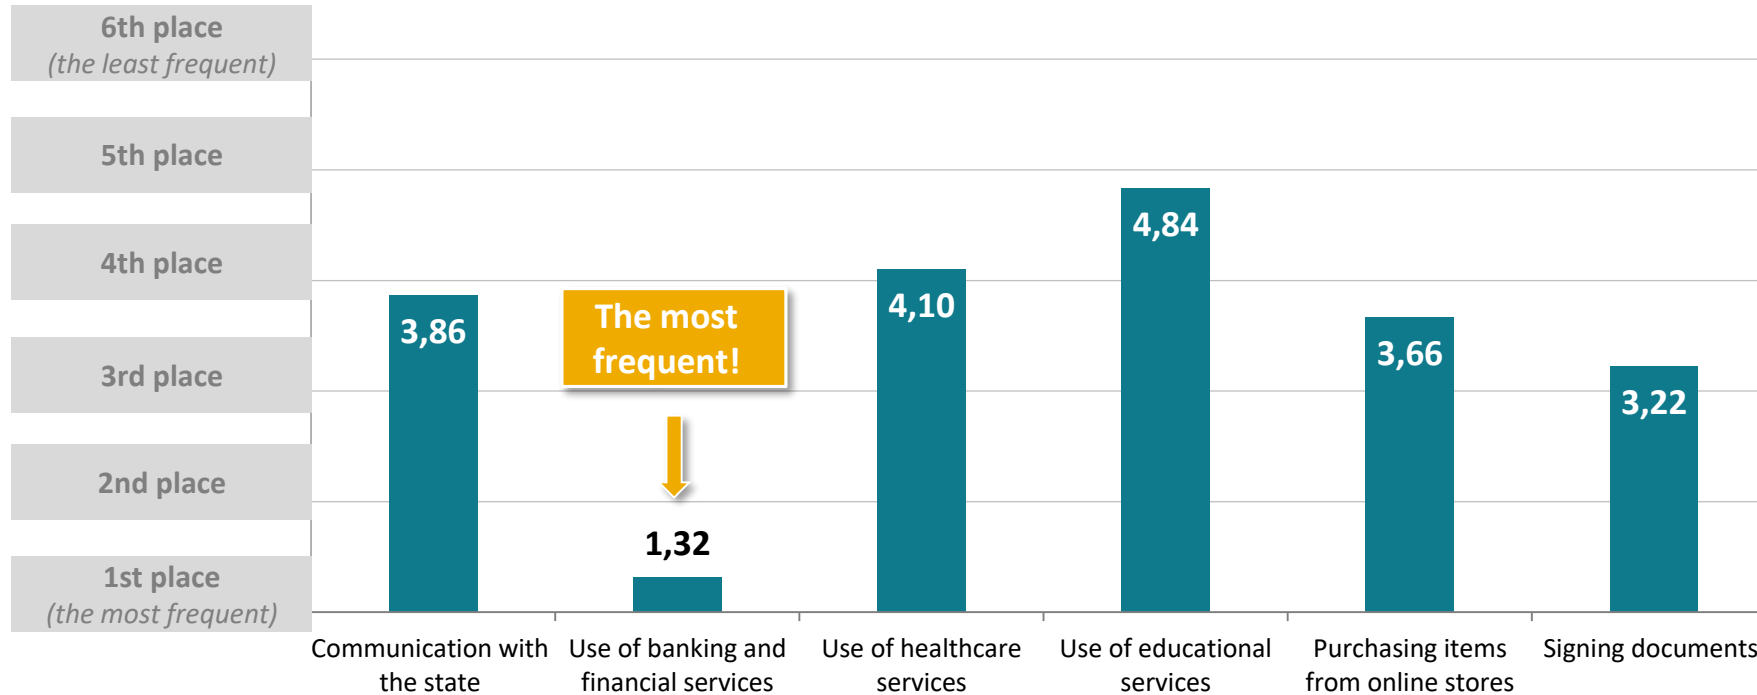

Q4. Is the identity of the electronic authentication solution's provider important to you?

Base: Users of at least one electronic authentication solution in the P6M, n=1003

Most frequent actions (mean)

ESTONIA

1% have not performed any of these actions in the last 6 months using electronic authentication solutions

2% mention also other actions, like: Logging in job related systems, Logging in to different systems etc.

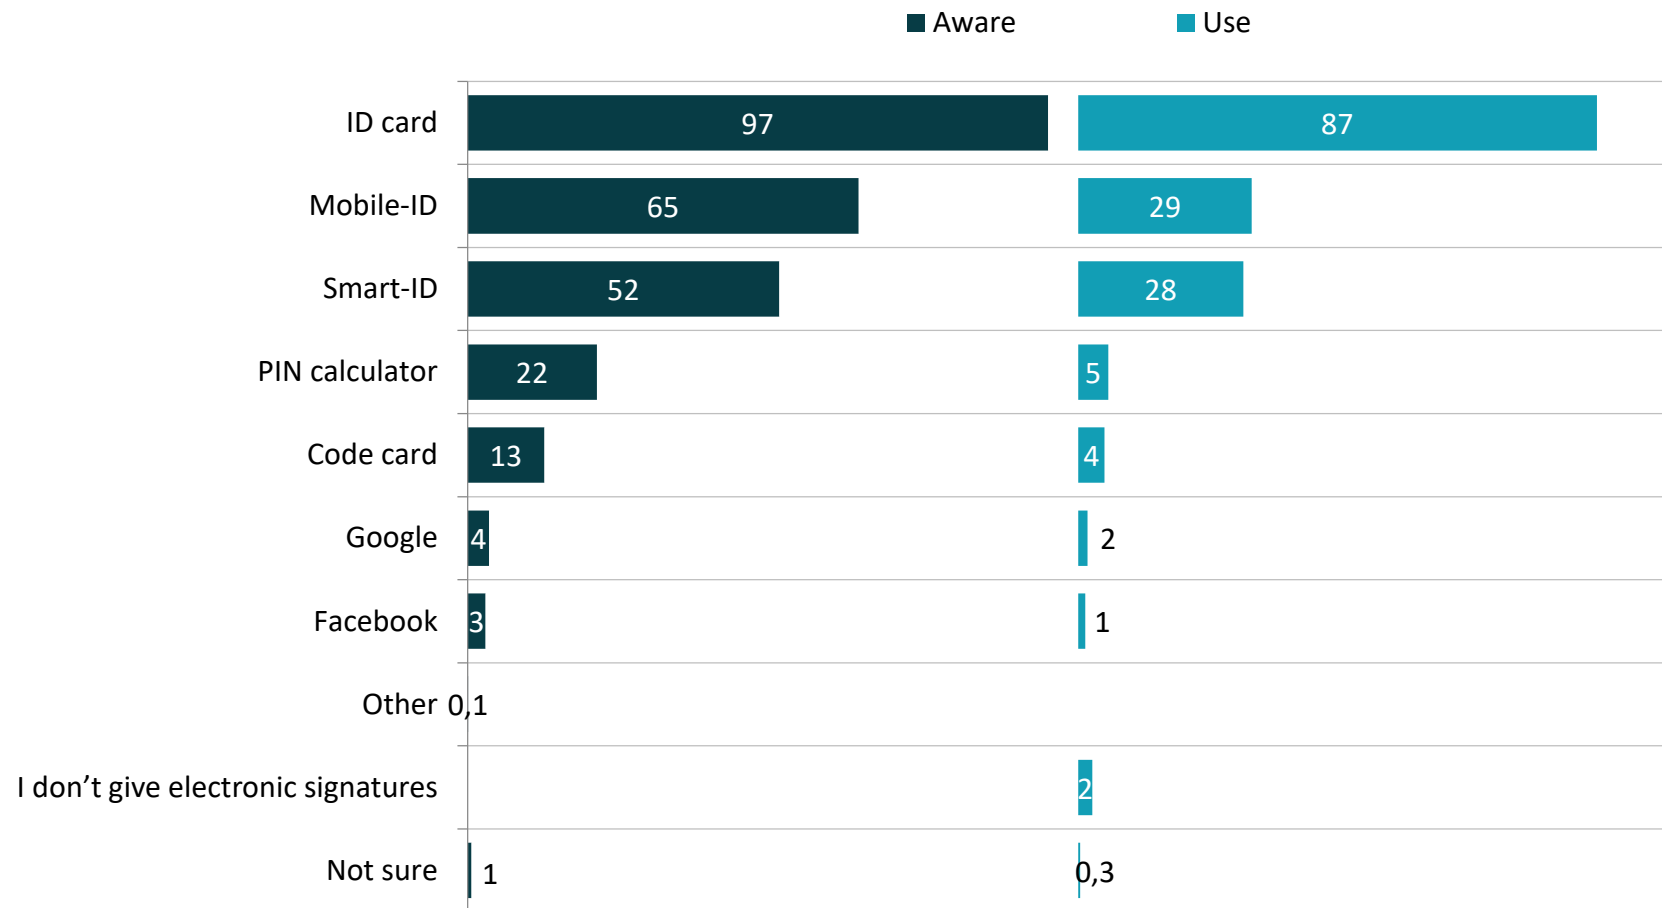

Q5. What kind of actions have you performed most often with electronic authentication solutions in the last six months? Please, rank these actions in the order of frequency – drag them to the right side starting with the first – most frequent.

Q5a. Are there any other actions you have performed with electronic authentication solutions in the last six months?

Base: Users of at least one electronic authentication solution in the P6M, n=1003

Awareness and usage of solutions for electronic signature (%)

ESTONIA

Q6. Do you know which solutions you can use to give an electronic signature? Please, mark all relevant answers.

Q7. Which solutions do you use to give electronic signatures? Please, mark all relevant answers.

Base: All respondents, n=1005/ Users of at least one electronic authentication solution in the P6M, n=1003

Intended actions with electronic authentication solutions (%)

ESTONIA

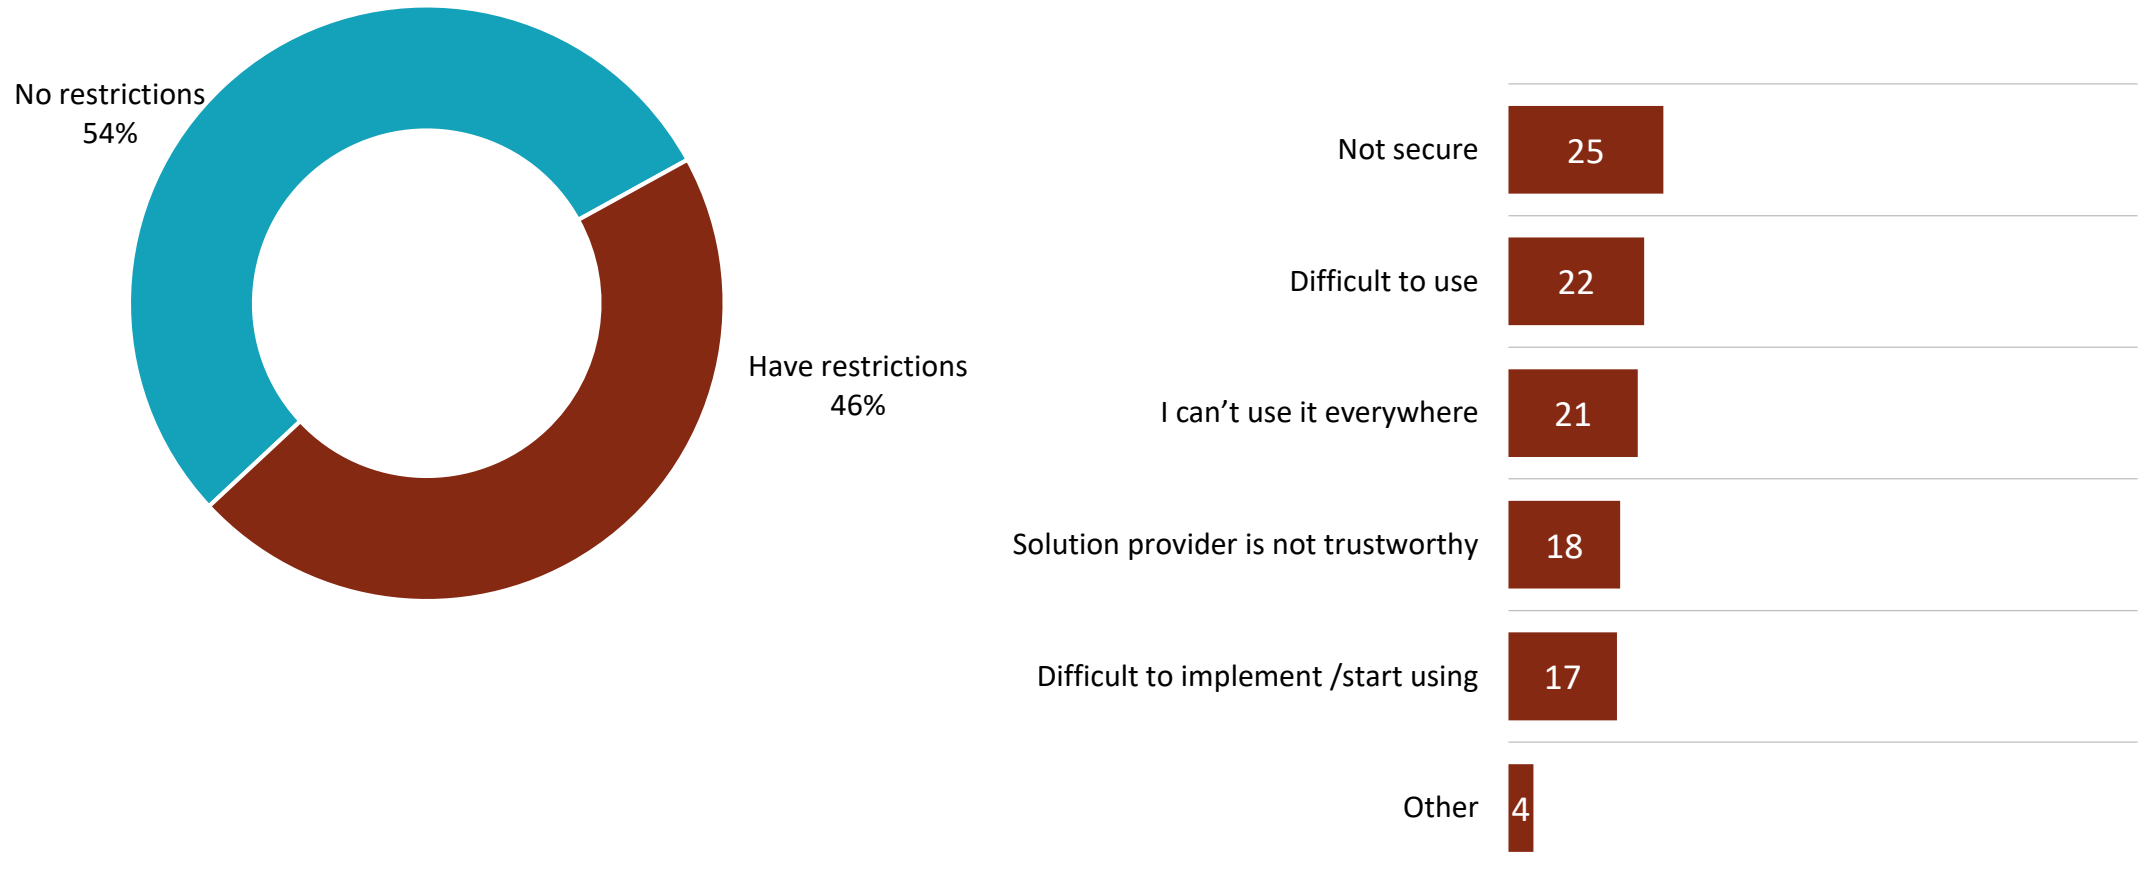

Q8. What kind of actions would you like to perform with electronic authentication solutions? Please, mark all relevant answers.

Multiple answers possible, $\Sigma > 100\%$

Base: All respondents, n=1005

Restrictions to use electronic authentication solutions (%)

ESTONIA

Q9. What kind of restrictions are stopping you from using electronic authentication solutions? Please, mark all relevant answers.

Multiple answers possible, $\Sigma > 100\%$

Base: All respondents, n=1005

Preferred devices for electronic authentication solutions (%)

ESTONIA

Q10. What kind of new opportunities would you like to see electronic authentication solutions offer in the future? Please, mark all relevant answers.

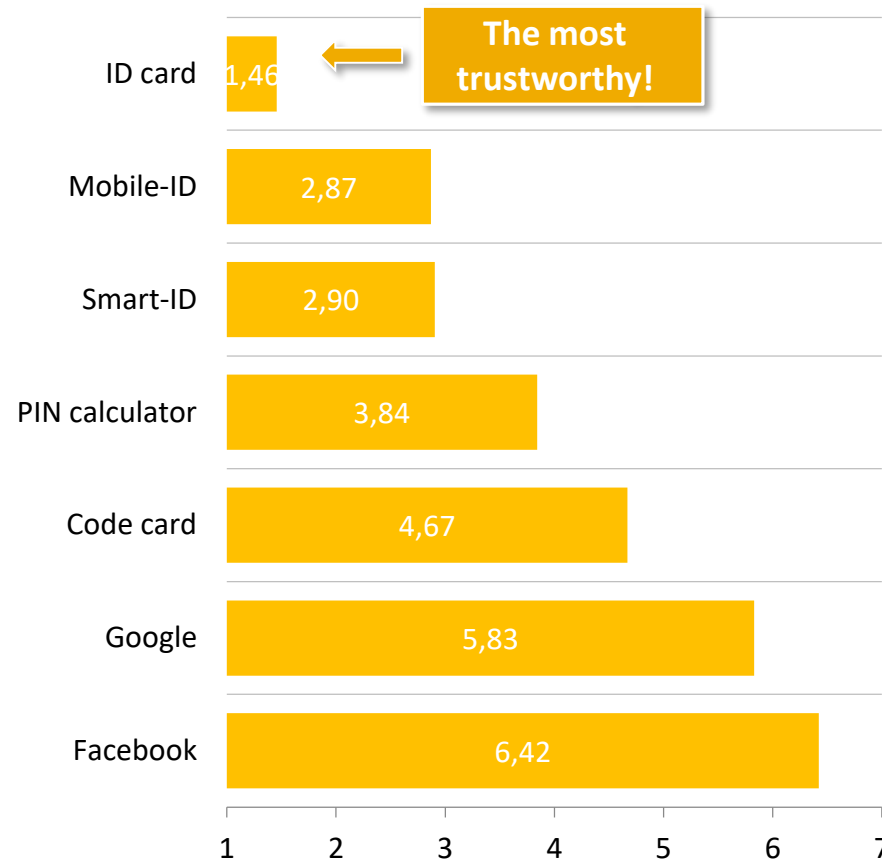

Multiple answers possible, $\Sigma > 100\%$

Base: All respondents, n=1005

Trustworthiness of the electronic authentication solutions (mean)

ESTONIA

Mean on the scale from 1 (the most trustworthy) to 7 (the least trustworthy)

2% can't decide which solutions are trustworthy

Q11. Which of these electronic authentication solutions are most trustworthy in your opinion? Please, rank these solutions in the order of trustworthiness – drag them to the right side starting with the first – most trustworthy.
Base: All respondents, n=1005

Main results - LATVIA

Usage frequency in the past 6 months (%)

LATVIA

Q1. How often have you used these types of electronic authentication solutions in the past six months?

Base: All respondents, n=1005

Importance: choice of electronic authentication solution (mean)

LATVIA

4% mention also other important factors, like:
Price/ free of charge, Fast, Modern etc.

Q2. What is the most important to you when choosing an electronic authentication solution? Please, rank these aspects in the order of importance – drag them to the right side starting with the first – most important.

Q2a. Is there something else that is/ would be important for you when choosing an authentication solution?

Base: Users of at least one electronic authentication solution in the P6M, n=995

Preferred devices for electronic authentication solutions (%)

LATVIA

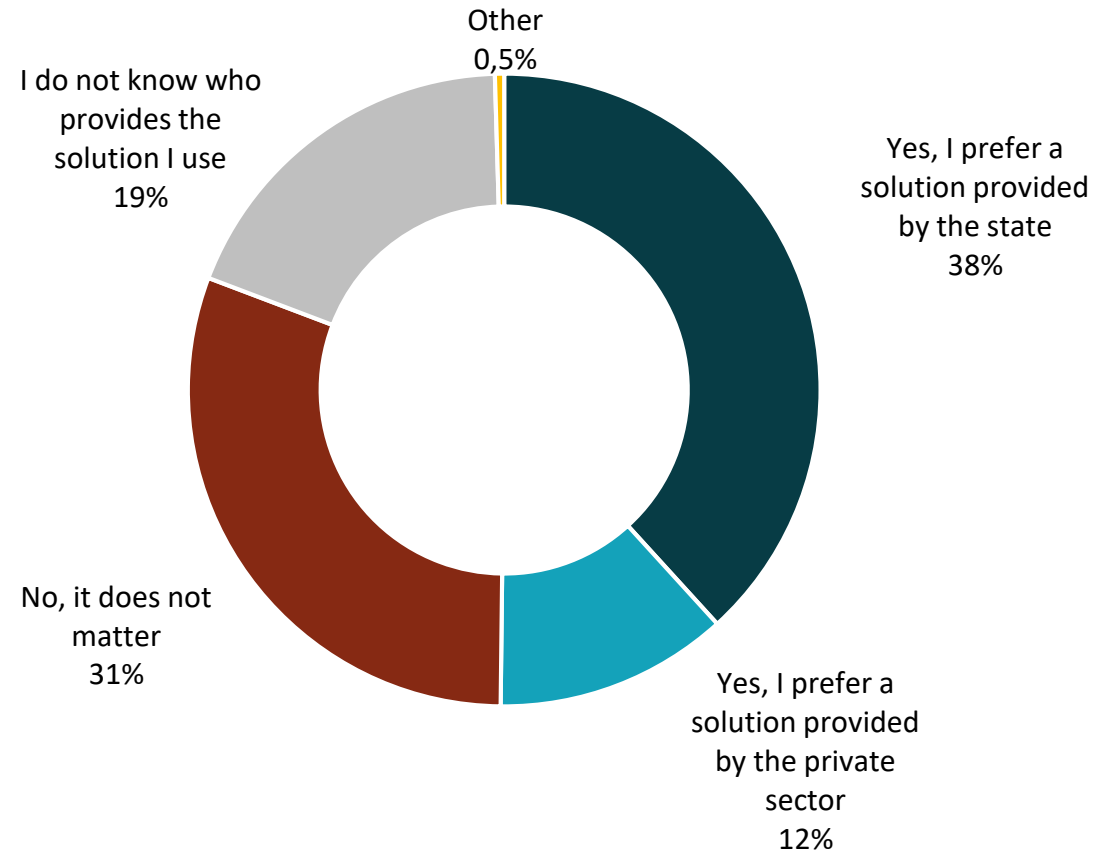

Q3. If you could choose, which devices would you prefer to use electronic authentication solutions on?

Multiple answers possible, $\Sigma > 100\%$

Base: Users of at least one electronic authentication solution in the P6M, n=995

Importance of the provider identity (%)

LATVIA

Q4. Is the identity of the electronic authentication solution's provider important to you?

Base: Users of at least one electronic authentication solution in the P6M, n=995

Most frequent actions (mean)

LATVIA

4% have not performed any of these actions in the last 6 months using electronic authentication solutions

2% mention also other actions, like: Registration in apps/ internet sites/ portals, E-voting, Searching real estate, Data protection etc.

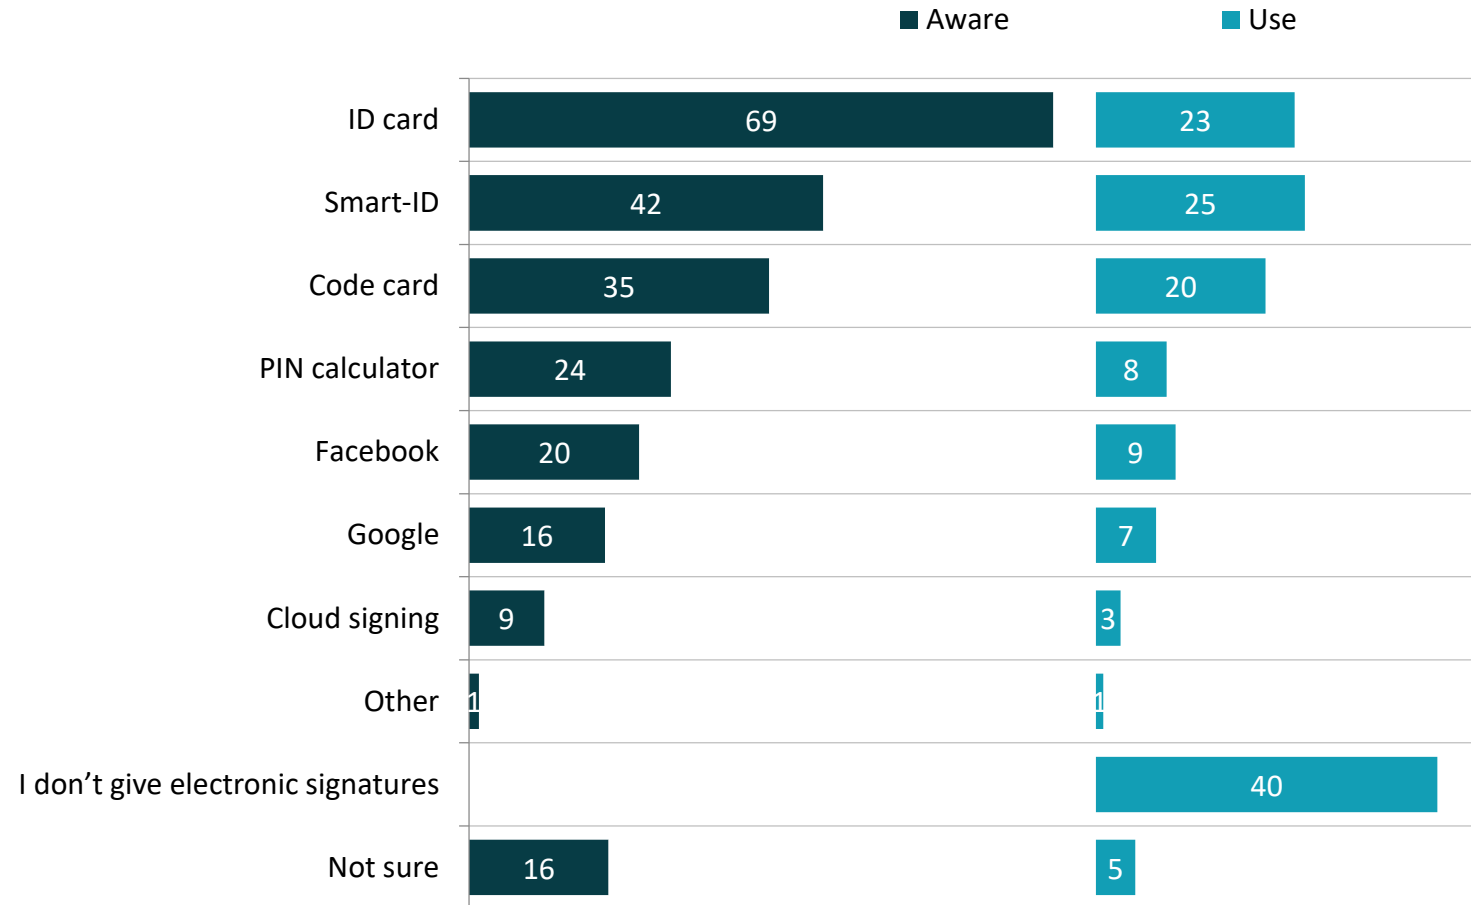

Q5. What kind of actions have you performed most often with electronic authentication solutions in the last six months? Please, rank these actions in the order of frequency – drag them to the right side starting with the first – most frequent.

Q5a. Are there any other actions you have performed with electronic authentication solutions in the last six months?

Base: Users of at least one electronic authentication solution in the P6M, n=995

Awareness and usage of solutions for electronic signature (%)

LATVIA

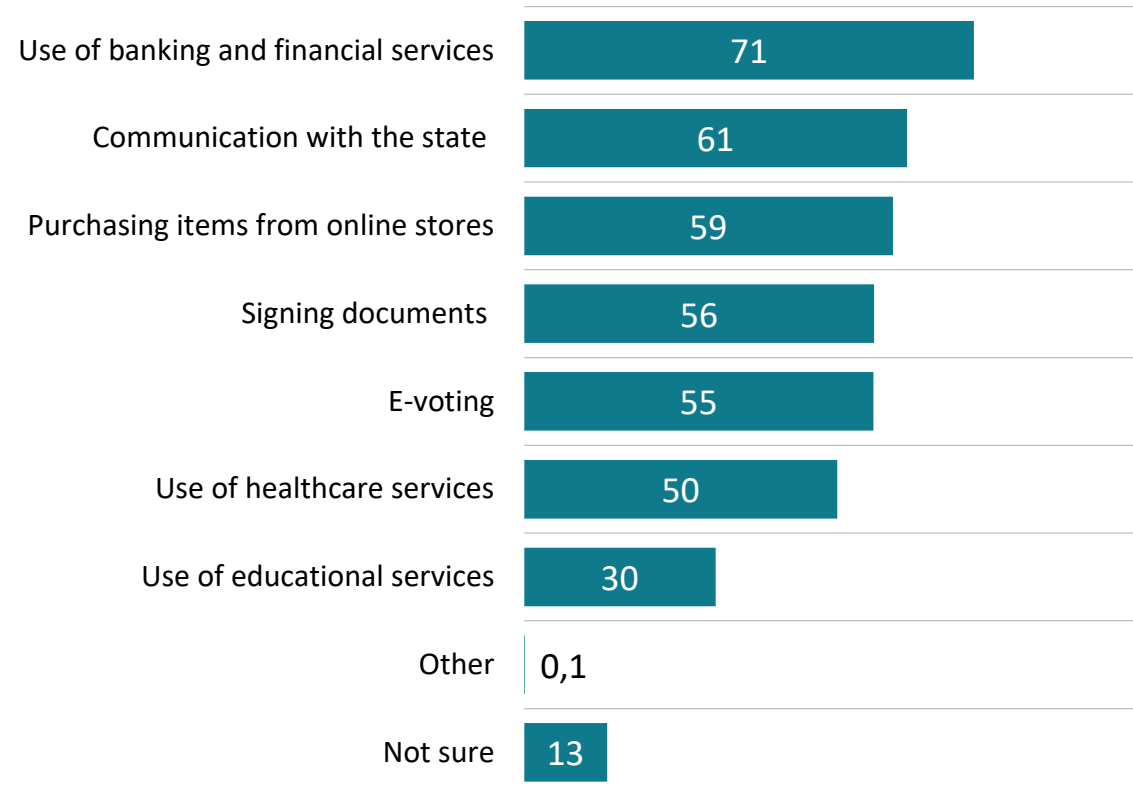

Q6. Do you know which solutions you can use to give an electronic signature? Please, mark all relevant answers.

Q7. Which solutions do you use to give electronic signatures? Please, mark all relevant answers.

Base: All respondents, n=1005/ Users of at least one electronic authentication solution in the P6M, n=995

Intended actions with electronic authentication solutions (%)

LATVIA

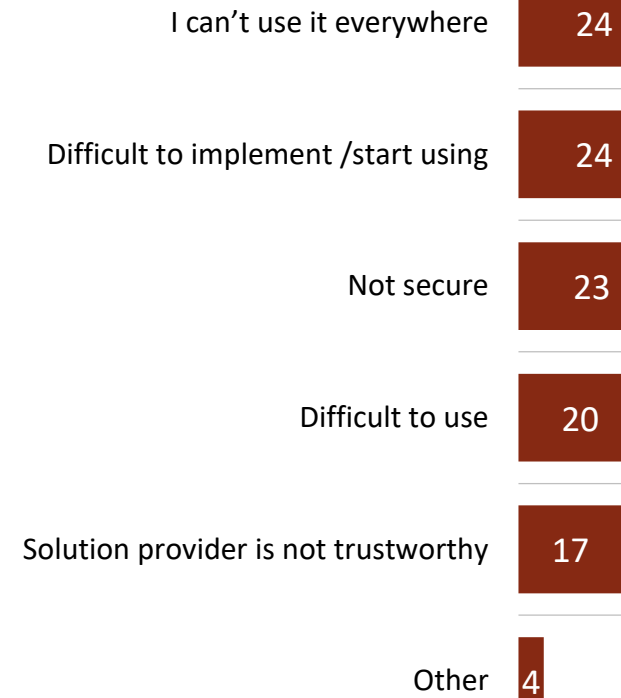

Q8. What kind of actions would you like to perform with electronic authentication solutions? Please, mark all relevant answers.

Multiple answers possible, $\Sigma > 100\%$

Base: All respondents, n=1005

Restrictions to use electronic authentication solutions (%)

LATVIA

Q9. What kind of restrictions are stopping you from using electronic authentication solutions? Please, mark all relevant answers.

Multiple answers possible, $\Sigma > 100\%$
