1. Introduction

The document describes profiles of certificates issued by KLASS3-SK 2016. OCSP responses of KLASS3-SK 2016 and KLASS3-SK 2010. CRL profile is applicable only for and KLASS3-SK 2010. No organisation certificates are issued under KLASS3-SK 2010, but the CA still holds valid certificates.

This document complements Certificate Policy [2] and Certification Practice Statement [1].

The organisation certificates are divided into following types:

- e-Seal Certificate used for proof of integrity of a digital document and the relation with the owner of such document (e-Seal certificate can be issued also without extension "idetsi-qcs-QcSSCD" see [2.2.2]);
- **Certificate for Authentication** certificate used for authentication of the subscriber in WWW or other data processing systems;
- **Certificate for Encryption** certificate used for data encryption.

Various areas of application can be combined into a single certificate. The area of application of e-Seal Certificate cannot be combined with other areas of application.

1.1. Terms and Abbreviations

Refer to Certification Practice Statement [1].

2. Technical Profile of the Certificate

Organisation certificate is compiled in accordance with the X.509 version 3, IETF RFC 5280 [3] and clause 6.6 of ETSI EN 319 411-1 [11].
