

Authentigate Service Terms

Effective date: 17.11.2025

Version History		
Date	Version	Changes
17.11.2025	2.0	Clarifications regarding new e-identity means eParaksts Mobile in LV and ID-card in EE (Zetes)
11.09.2024	1.0	First public version

1. Principles of Use of Authentigate Service:

1.1. Authentigate Service enables Subscriber to request and receive verified information about the User. Detailed description of the Service and integration instructions are available: <https://github.com/SK-EID/authentigate-documentation>.

1.2. When using Authentigate Service, the General Terms of Subscriber Agreement apply.

1.3. The malfunction, interruptions or outages of third-party eID service providers (i.e eParaksts Mobile, authentication with Estonian ID-card certificates issued by Zetes etc) that are used to authenticate users in the Authentigate service, are not deemed an Unscheduled Service outage.
